SOUND FAMILIAR?

5 critical problems hidden in plain sight

1

Tasks disappear

Verbal assignments fall through the cracks.
Who did what, when it was finished unknown.

2

The field is a black box

Is the team on-site or in the office? Where exactly?
Real performance stays invisible.

3

Data gets buried in WhatsApp

Photos, reports, forms vanish in group chats.
No search, no archive, no accountability.

4

Gut feeling, not data

No department benchmarks, no KPI analysis, no trend tracking.
Spreadsheets are always outdated.

5

Systems don't talk to each other

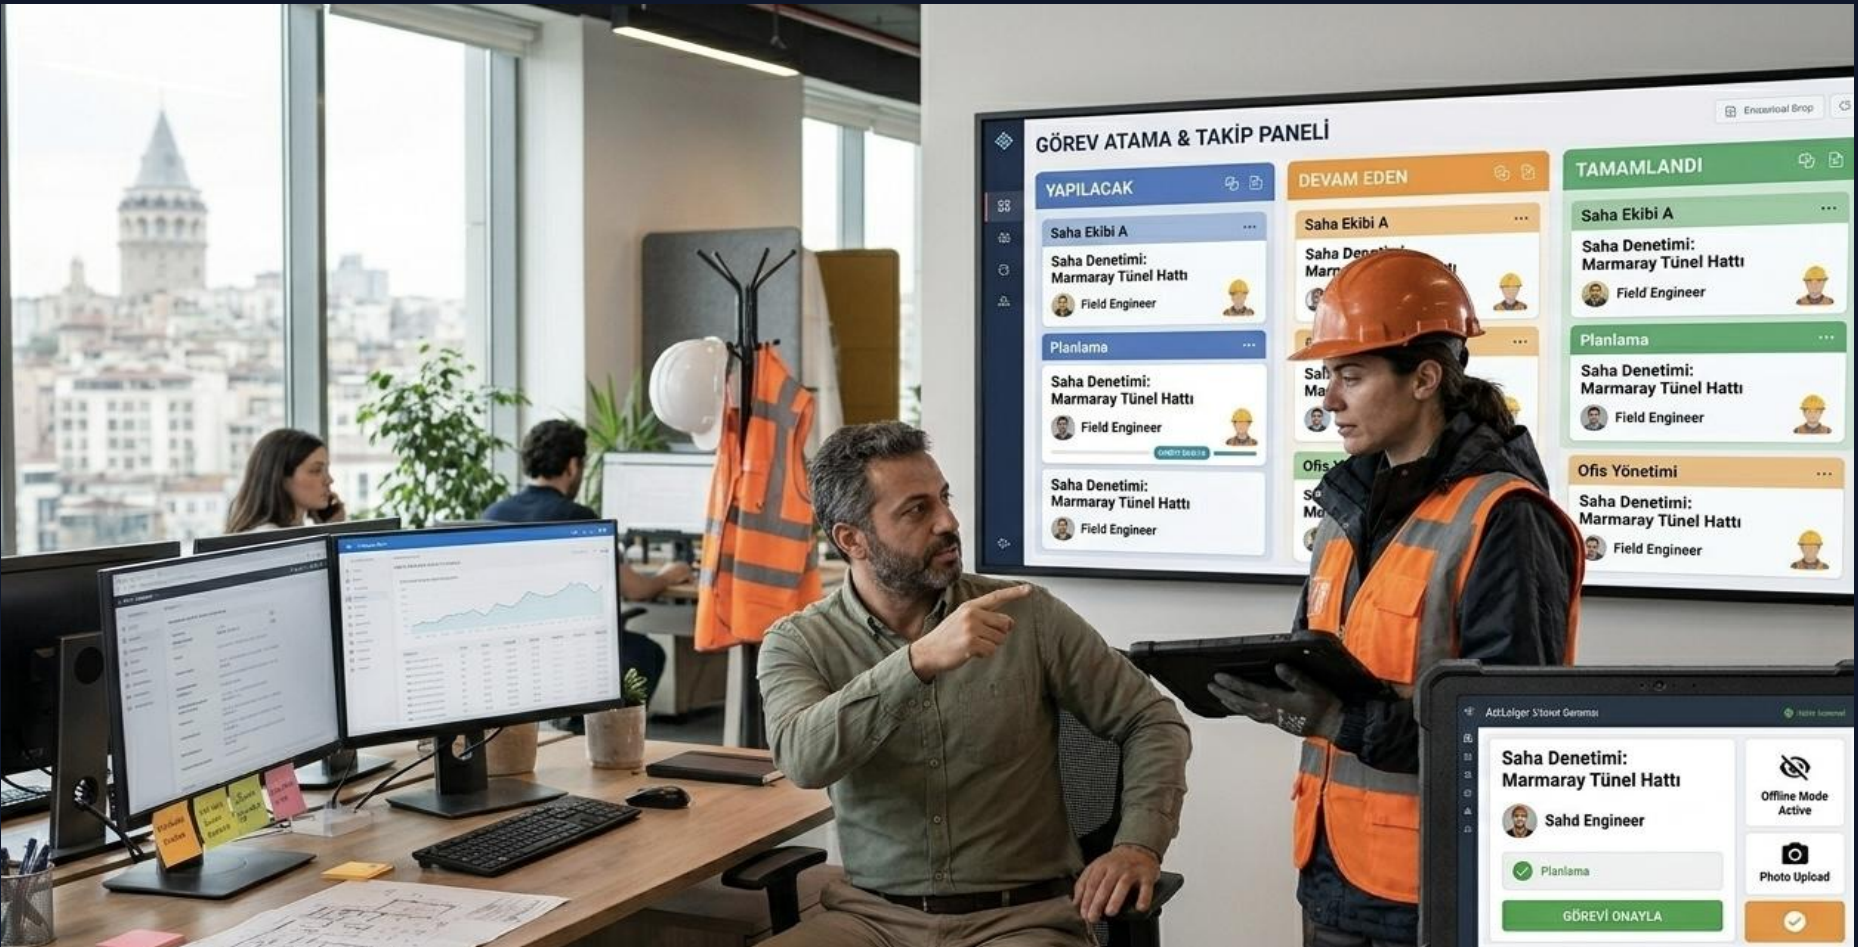

ERP, CRM, HR live in silos.
10 different screens to see the full picture.

"Most of these end with someone opening a spreadsheet, right?"

WEB PLATFORM

Everything on one screen.

Manage, analyze, and benchmark your operations end-to-end.

Dashboard & KPI

Live metrics, department filtering,
5-layer KPI engine

Task Management

Assignment, checklists, photo documentation,
Kanban / List / Calendar views

Digital Forms

20+ field types, GPS stamp,
QR, signature, camera, rating

Data Comparison

Department vs. department,
period vs. period benchmarking

OperIQ AI Engine

AI assistant: ask your data questions,
risk analysis, anomaly detection

Live Map & Heatmap

GPS tracking + 2D/3D facility plans,
density heatmap analytics

AI ENGINE

OperIQ:

Ask your data anything.

AI-powered operational intelligence -- instant answers to every question.

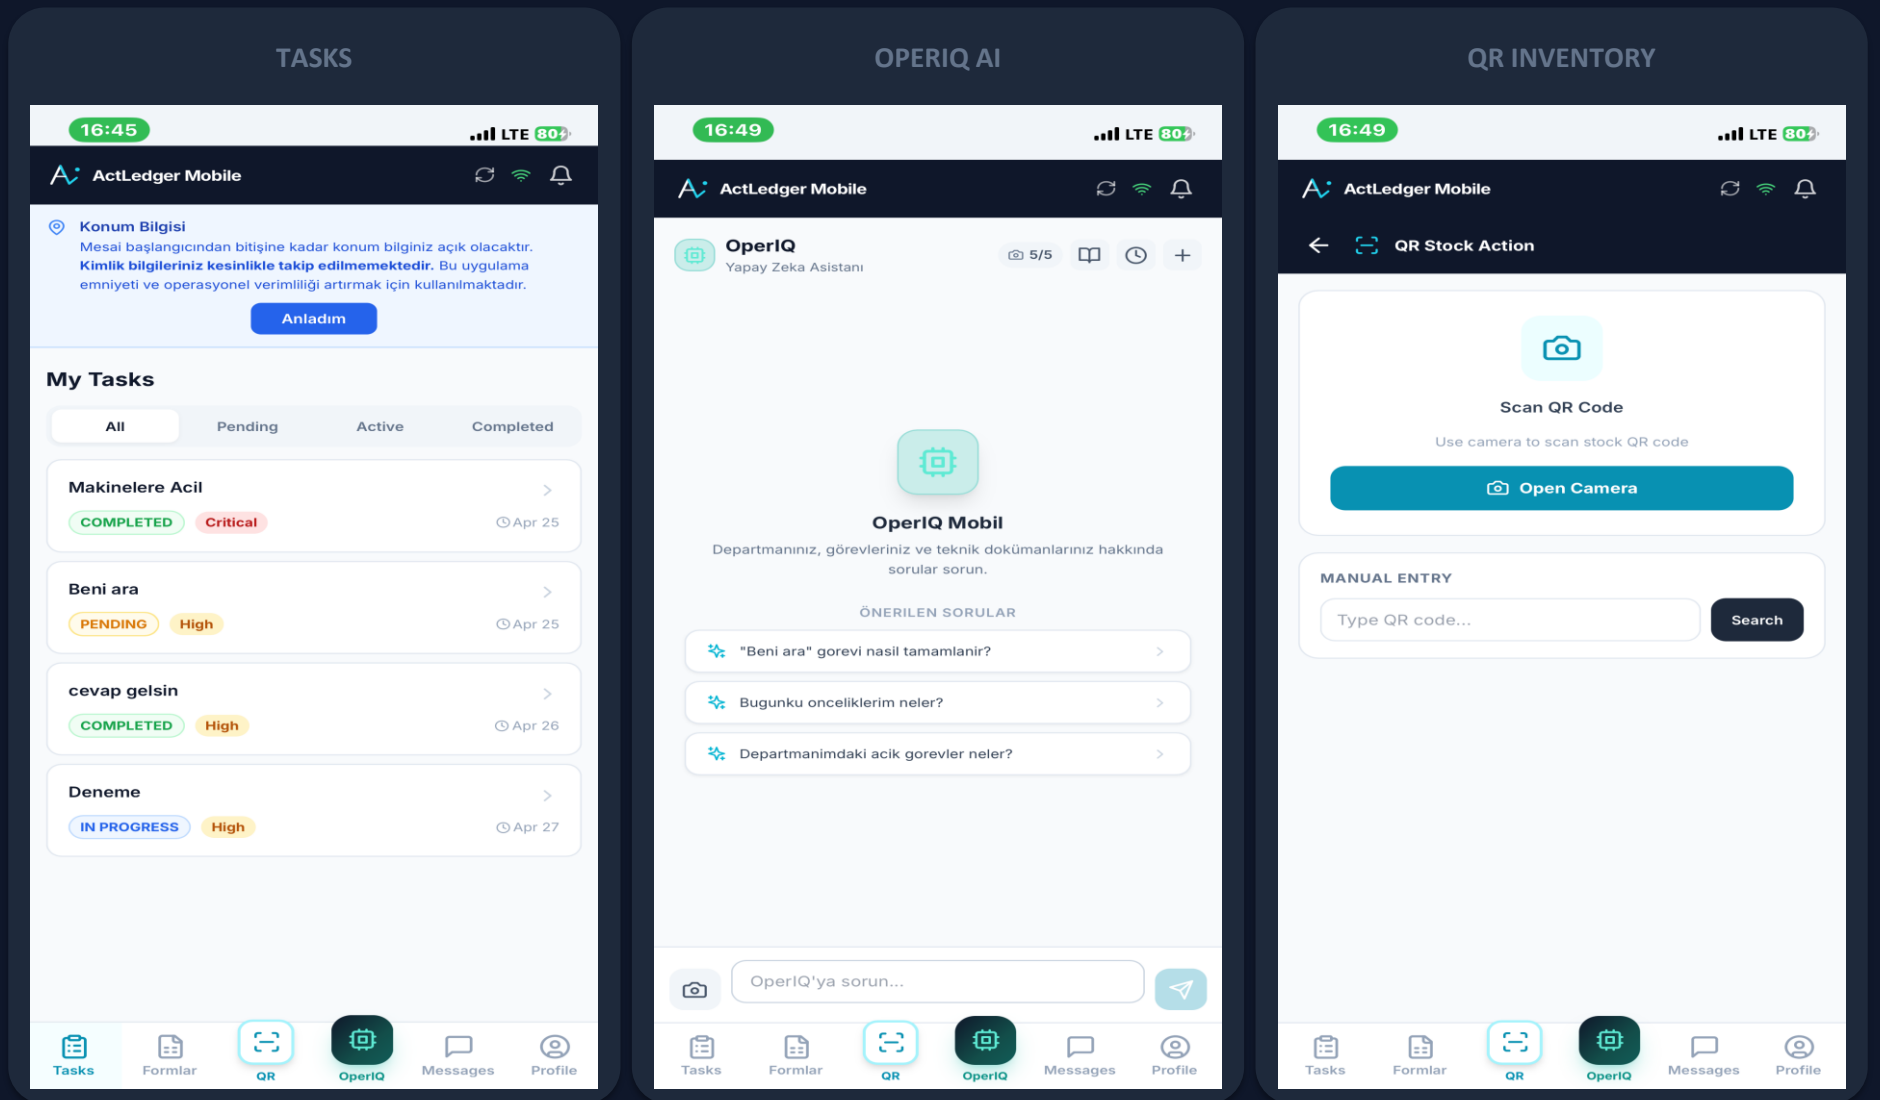

- **General Summary Analysis**
Instant X-ray of all your operations
- **Efficiency Analysis**
Department-level performance benchmarking
- **Risk Assessment**
Detect potential issues before they surface
- **Task Prioritization**
AI-recommended smart work ordering
- **Anomaly Detection**
Automatically flag data deviating from normal
- **NLP Chart Generation**
Ask in natural language, get charts instantly

MOBILE APP

Instant access from the field.

iOS & Android -- tasks, messages, inventory, sales, location. All in your pocket.

- Live location sharing -- see where your field team is, instantly
- Photo documentation -- attach photos to tasks, date/GPS stamped
- QR inventory operations -- scan barcode, update stock in real time
- Mobile POS -- make sales on-site, issue receipts on the spot
- In-app messaging -- team communication without relying on WhatsApp

KPI ENGINE

7,800+ ready-made KPI templates.
5-layer performance measurement.

PERFORMANCE

Productivity, efficiency, output metrics

QUALITY

Error rates, customer satisfaction, compliance

TIME

Delivery time, delay rates, SLA adherence

RISK

Unsafe conditions, failure frequency, loss ratios

AI INSIGHT

Predictive metrics auto-generated by OperIQ

15 sector templates | 576+ department templates | Setup in minutes

Manufacturing · Healthcare · Retail · Logistics · Construction · Energy · Government · HoReCa · Finance · Transportation
· Media · IT · FMCG · Commerce · Startup

LOW-CODE PLATFORM

Canvas Ledger: Build processes without IT.

Form Builder

20+ field types: QR, GPS, camera, signature, rating, slider

Custom Fields

Add custom fields to any module, rule-based auto-tagging

Business Rules

Conditional logic definitions, automatic triggers

Report Builder

Custom report templates, scheduled auto-delivery

Approval Flows

Multi-step approval chains, hierarchical authorization

Data Views

Filterable data display, saved custom views

Integrations

External system connectors, webhook & API links

COMPARISON

ActLedger vs. Legacy Systems

CRITERIA	ACTLEDGER	LEGACY
System type	Unified Operational OS	Fragmented (ERP+IT+CMMS)
Field management	Powerful & real-time	Limited or none
Mobile experience	Mobile-first, user-friendly	Limited or complex
Artificial intelligence	Native AI (OperIQ)	Limited or add-on
NLP data visualization	Yes (natural language to chart)	No
Live map + heatmap	Yes	No
IoT integration	Native	Add-on module
KPI management	5 layers, 7,800+ templates	Separate modules
Automation engine	Trigger-condition-action	Limited or extra software
Low-code extension	Canvas Ledger (7 modules)	Separate platform needed
Setup time	Days	Months
Pricing	Budget-friendly	High cost
Ease of use	Very easy	Hard to learn
Sales + Accounting + HR	Integrated	Separate software
